

Simple and safe docking for the Galaxy Tab Active 1 , 2 and 3.

The Portsmith portDox Multidock for the Galaxy Tab Active is an innovative product designed specifically for business and enterprise.

When multiple Galaxy Tab Active tablets are deployed and require an enterprise grade multi-bay dock, the Portsmith portDox Galaxy Tab Active offers five docking bays eliminating the requirement for a single wall charger for each tablet.

#### Reliable and simple to use

- Durable design for enterprise use
- Installable on a desktop or in an optional secure cabinet
- Five bays for five Tab Actives in the Samsung supplied protective cover
- LED's show charging status at a glance

#### Pogo pins for power

- Tab Active docks on its pogo pads
- Saves wear and tear on the tablet's USB connector from repeated insertions of charging cables

#### Safe, protective, power for the dock and the tablet

- A superior implementation using proven Portsmith technology
- Slot power is 'off' until the dock detects a Tab Active inserted protecting the dock from possible short circuit situations on its pogo pins
- Over current protection shuts down individual bays in the event of a fault, protecting the charger and Tab Active if it draws current in excess of its technical ratings
- End user can at a glance determine if each Tab Active is charged or not

#### Dimensions and weights with Tab Active loaded:

160 w x 238 d x 155 h mm (6.4 x 9.4 x 6.2 h inches)
